Cleaning Log

Issue Category	Description Found	Cleaning Action Taken	Impact / Logic
1. Inconsistent Distributor Names	Several naming inconsistencies like Upper case, extra spaces between spellings, spelling typos (Distrbution, Trader), and abbreviations (Dist. vs Distributors) were found.	Removed Inconsistency to derive **5 unique distributor entities-** • Chennai South, Distribution,• Coimbatore Agro Traders,• Madurai Retail Hub,• Salem Fresh Foods,• Trichy Central Distributors- using Replace Values in Power Query.	Ensures accurate aggregation per distributor without fragmented metrics.
2. SKU Naming Standardization	SKU variation: Coldpressed Sesame Oil 1L vs Cold Pressed Sesame Oil 1L.	Mapped Coldpressed Sesame Oil 1L to Cold Pressed Sesame Oil 1L. Corrected using Replace Values and TRIM in Power Query.	Consolidated all Sesame Oil 1L sales into a single SKU bucket (6 canonical SKUs total).
3. Duplicate Records Identified	2 transaction records became exact duplicates once SKU names were standardized.	Removed **10 duplicate rows:** First before naming inconsistencies that's when 8 duplicates were removed. After correcting naming consistencies, 2 duplicates were removed. Used Remove Duplicates in Power Query.	Reduces total valid rows from **320 to 310** rows.
4. Missing Values Handling	**10 cells** were missing Qty_Sold and Sales_Value	Flagged as incomplete/unbilled transactions and excluded from sales sum calculations. It is highlighted using conditional formatting using Excel.	Prevents skewing average basket calculations and artificial price/quantity distortion.
5. Date Format Correction	Mixed date formats present: YYYY-MM-DD, DD/MM/YYYY, DD-MM-YYYY.	Converted date formats to DD-MM-YYYY to attain uniformity using Power Query.	Enables accurate month-on-month and June-July month transaction details.

Note: Used Power Query for Cleaning the whole Data.
